Access Right Management Standard

Approved by CEO
31 March 2025

1. User Management Process

User management for employees involves the following three processes:

- User creation
- Change of position/role
- User termination

The key players (departments) that are involved in user management process are:

- General Manager/Head of Dept/Line Manager
  General Manager or Head of Dept is the overall responsible person for employees in a country or HQ Dept. A General Manager or Head of Dept can employ, reassign and terminate users. The role can be delegated to Line Managers within a country or HQ Dept.

- Business Control and Compliance & Legal Director
  Compliance & Legal Director is responsible for the insider rules, policies, code for corporate governance etc.
  Financial access in BI is approved and given firstly by Head of Accounting or secondarily by Compliance & Legal Director.

- Second Line Support (SLS)
  Second Line Support takes care of user administration in production systems (i.e. Spaceport/Guru).

- Corporate IT (CIT)
  Corporate IT is responsible for Infrastructure and MS operations, Help desk portal and Application support. CIT administers users in internal systems (i.e. Microsoft Entra ID in Microsoft environment) and carries out users and devices administration in IT-systems.

- IT Operations
  IT Operations maintain and control the production systems.

2 Workflows for User Access Management

2.1 New User Creation Workflow

Following is the workflow when the General Manager, Head of Dept or Line Manager wishes to create a new user.

1. The General Manager/ Head of Dept/ Line Manager must create a user profile in Personio. An automated script creates Microsoft accounts and email address for the new user. then fill in and submit the Request User Creation Form in: User Account Ordering Portal (UAOP) with at least the following information:

- Name of the employee (first and last name)
- Job Title
- Tradedoubler company/Business unit
- Date of employment
- Spaceport/Guru security roles
- CRM access required or not

2. Once the "Request User Creation Form" is submitted, approval requests are sent to:

a) Local General Manager for local Spaceport/Guru and/or BI access request
b) Legal if multi-market Spaceport/Guru and/or BI access is requested.

3. . CRM and BI access are automatically added to the user if requested. Requestor gets the status order delivered in (UAOP) and an email is sent to requestor with the user's first login details. Some additional settings are manually set via requests in the Help Desk Portal.
4. SLS department starts working on the user creation in Spaceport/Guru and any other required changes in the systems.
5. Once the SLS department completes their tasks regarding the new user creation, they send an email confirming the user creation to the requestor.
6. Access to BI Financials shall be approved by Head of Accounting. If new insider (full access to BI Financials) informs Legal/Internal control by email for updates of permanent insider log book.

During the process, the "Request User Creation" can be in one of the following statuses:

- Pending approval: Waiting for the approver of the request to review and approve it (manager, Head of Accounting, Legal, etc.)
- Ordered: Request waiting for execution
- Delivered: Request fulfilled
- Rejected: Approver rejected the request
- Cancelled: Cancelled by requester
- Expired: Delay expired for the request to be approved

However, as a user you will receive an email every time the status changes to the current status.

2.2 Change of position/role

Following is the workflow when the General Manager, Head of Dept or Line Manager wishes to change/update position/role of an existing user. The request is sent to HR for approval.

- If approved update Personio

Once Personio has been updated, the title is automatically synchronised to Microsoft user.

2.3 User Termination Workflow

Following is the workflow for user accesses when the General Manager or Head of Dept terminates an employee or an employee leaves Tradedoubler due to any reason.
For a complete termination check list please see link. The General Manager, Head of Dept or Line Manager fills in and submits the "Ending of User Account Form" in (UAOP) with at least the following information:

- Name of the employee (first, last name)
- Date of termination
- Name of:
    - Person to reconnect CRM records to
    - Person to reconnect Spaceport records to
    - Person to forward emails to

1. Once the "Ending of User Account form" is submitted, it gets the status of Submitted.
2. Microsoft account is disable automatically by Personio when the account is deactivated. and SLS department immediately disable the user accounts and starts working on the permanent deletion of user from the Spaceport and other internal systems which when it is done sets the status of the form to Completed.
   (Note: The CIT and SLS department must permanently delete the user accounts within one month from the last employment date. Disable user in Microsoft Entra are automatically deleted after 1 month).
   During the process, the "Ending of User Account form" can be in one of the following statuses:

- Submitted: When the General Manager or Head of Dept submits the "User Termination Form".
- Completed: When the user is successfully deleted from all systems.

2.4 Exception from above – BI/SP several/all Regions access

Several or ALL markets/regions access in Spaceport/Guru and BI shall be approved by Legal.

2.5 Exception from above – BI Financial access

The below BI accesses shall be approved by Legal:

- BIDev – users with this access becomes permanent insiders
- BI_Business_Control – users with this access becomes permanent insiders
- BI_FINANCIAL_ALL_MARKETS_LIMITED
- BI_FINANCIAL_ALL_MARKETS_COVouchers

- Compliance & Legal Director will then update the Permanent Insider list as well as inform permanent insiders about Tradedoubler´s Insider Policy etc as required by law..

Formaterat: Indrag: Vänster: 3 cm, Ingen numrering

2.4 Exception from above – Metapic

Onboarding a new employee

1. The hiring managers have to inform the local HR manager (usually only applies in UK, Germany, Sweden) or take care themselves to set up a Personio account as soon as an employment agreement is signed.
2. After setting up the Personio account, the email is automatically created with the following format name.lastname@metapic.com
3. The guide on how to set up the company portal will be sent to the hiring manager or the private email of the new hire before the start date. The manual will not be sent to the new Metapic email of the new hire, because they won't be able to access it before setting up the portal.
4. You do not have to fill in the SelfServie Portal anymore to set up an email.
5. If you have any questions regarding Personio, please reach out to Linnea Castenfors. If you need anything related to company portal, emails and Office365, please reach out to Bruno Duro.
6. Please also take care of the following after the company portal is set up:
    1. Access to Admin App & Bitwarden (a.k.a. vault or vaultwarden) -→ add support ticket https://metapic.atlassian.net/servicedesk/customer/portal/1
    2. Mailchimp and Canva if needed also add that to the support ticket.

Offboarding an employee

1. Remove access to Metapic Admin & vault send in a ticket to https://metapic.atlassian.net/servicedesk/customer/portal/1 with the email address

2. Fill out for terminating BI / Office365
