IT User Guidelines

Approved by CEO
12 March 2026

1 Purpose and goal

The purpose of Tradedoubler's IT User Guidelines is to ensure the proper use of Tradedoubler's IT systems and make users aware of what Tradedoubler deems to be acceptable and unacceptable usage. Tradedoubler reserves the right to amend this document at its discretion. In case of amendments, users will be informed appropriately.

The goal is also that all Tradedoubler's personnel should understand the importance of handling all data in a secure and responsible manner. Third parties should be able to trust Tradedoubler to handle sensitive information such as sales data without that information leaking to competitors or other unauthorized persons.

1.1 Motive

Tradedoubler's personnel handle confidential information such as business agreements, social security numbers, bank account numbers, sales data, personal data and additional sensitive information for Tradedoubler and third parties. Therefore, it is of utmost importance that all handling of sensitive information is done in a secure manner and in accordance with GDPR and communicated GDPR related policies.

2 Legal issues and requirements

Email is a business tool and users are obliged to use this tool in a responsible manner. Although email is more casual than written communication, the same laws apply. By following and understanding this document the user can minimise the risks for the user and Tradedoubler while using email. If the user disregards the rules set forth in this document, the user will be fully liable for the content of the email/emails in question.

The following rules are required by law and should be strictly followed. You should be held liable if you:

- Send or forward emails containing any libellous, offensive, prejudice or defamatory remarks.
- Send an attachment that contains malicious code/software.
- Send unsolicited email messages.
- Forge or attempt to forge email messages.
- Send email from another user's email account without prior consent.
- Disguise or try to disguise the user identify while sending email.
- Unlawfully forward confidential information.

2.1 Disclaimer

The following disclaimer should be appended to all outgoing emails:

"The information in this email is intended only for the use of the addressee. If you are not the intended recipient, you are hereby notified that any dissemination of this communication is strictly prohibited and may be unlawful. If you have received this email in error, please notify Tradedoubler immediately and erase all copies of the message."

2.2 Information classification

All information within Tradedoubler must be handled according to the Information Classification Guidelines. It is the responsibility of each user to adhere to these.

3 Basic guidelines for handling IT resources

3.1 Private usage

Although Tradedoubler's IT systems is meant for business usage, Tradedoubler allows personal usage if it is reasonable and does not interfere with work or Tradedoubler's business.

It is not reasonable to play computer games, etc., during business hours and when company activities and overtime work is ongoing in Tradedoubler offices.

Private email accounts are not allowed to be downloaded to a client on the user's computer and should preferably only be checked via web mail. No attachments from private email accounts are allowed to be downloaded without prior consent from CIT (Internal System).

3.2 Internet usage

Some private use of internet is accepted, if it is not interfering with your work. See the Information Security Standard section 6.4 for allowed usage of Tradedoubler's devices and network resources. For any questions, please contact CIT.

3.3 Tradedoubler hardware and software standard

All Tradedoubler hardware and software should be ordered through the company purchase process. Tradedoubler strives to keep a standard configuration of all hardware and components. The current standard configuration is set by CIT and is evaluated on regular base. Any exceptions from the standard configuration should be approved by the Head of CIT.

3.4 User's accounts

All accounts maintained on Tradedoubler's system are Tradedoubler's property. Tradedoubler holds the right to check on your account and your actions if there are any reason to suspect that Tradedoubler policies are not followed and that Tradedoubler and/or our customers´ business can be harmed. The decision to do this control needs to be approved by the CEO for the Tradedoubler Group.

4 Data and security

Data security is everything regarding the handling of passwords and data. Example of passwords related security is the length, time limit and sharing of passwords. Example of data security is backups and handling of printouts. See the following sections for instructions.

4.1 Personal data

Each user is responsible for handling personal data according to the communicated policies. See the following policies:

- External Privacy Policy (client and user's personal data)
- Accounting & Personal Data Policy (payroll and publisher payment)
- GDPR Client Policy (advertisers and publisher's employee personal data)
- Human Resources & Personal Data Policy (applicant and employee personal data)

4.2 Password

Tradedoubler's password management is described in the Information Security Standard, section 6.3.

4.3 Bring your own mobile device

Tradedoubler's employees and consultants may use personally owned portable devices to access the Tradedoubler IT environment including data, networks and other resources as necessary in the course of their normal business routines in support of the Tradedoubler's published goals and objectives, provided they adhere to the minimum-security requirements places on the device and its usage. The relevant security requirements can be found in the Information Security Standard, chapter 5.

4.4 Laptop policy

Tradedoubler owned mobile devices must not be changed from the minimum-security configuration given in the Information Security Standard, chapter 3.

4.5 Backup

The user is responsible for handling backups of any documents on their hard drive or file server. Measures to achieve this are found in the Information Security Standard, chapter 8.

4.6 Working from home

When working from home (teleworking) it is important to follow the minimum-security requirements stated in the Information Security Standard, section 6.5.

4.7 AI usage

AI usage within Tradedoubler (e.g. sharing information with a LLM or using generative AI tools) must be handled according to the AI Policy, Information Classification Guidelines and Information Security Standard Section 4.5. It is the responsibility of each user to adhere to these.

5 Clear desk policies

5.1 Clear screens

All users of workstations and PC's/laptops must make sure that the computer screen is locked when they leave their desktop unattended.

5.2 Clear desks

A user should never leave important information such as contracts, legal documents, software specification etc., when they are not present at the office. The user's desk should also be cleared before hosting any visits from non-Tradedoubler personnel.

6 Questions
